SUPPLEMENTARY INFORMATION:

I. Background

The Intergovernmental Panel on Climate Change (IPCC) was jointly established in 1988 by the United Nations Environment Programme and the World Meteorological organization to conduct periodic assessments of the state of knowledge concerning global climate change. The IPCC has formed working groups to study various aspects of climate change. Working Group I addresses the state of the science concerning what is happening and is projected to happen to the climate; Working Group II addresses the state of the science concerning (i) vulnerability to and impacts of climate change and (ii) adaptation and mitigation strategies; and Working Group III addresses the state of science and understanding concerning economics and cross-cutting issues associated with climate change. Each Working Group is charged with issuing periodic assessments. The first Scientific Assessment of Climate Change, for example, was prepared in 1990. Periodic assessment reports such as this provide a comprehensive statement of the state of knowledge concerning topics such as scientific information, environmental impacts, response strategies, and other issues concerning climate change. The draft 1995 Assessment represents the result of Working Group II efforts since its inception to address the consequences and impacts of climate change and response strategies focusing on mitigation and adoption.

II. Public Input Process

The member countries of the IPCC established a timetable that requires comments from governments be received by April 28, 1995, so that the IPCC Secretariat can meet its obligations for a timely completion of the 1995 IPCC Assessment. The Subcommittee on Global Change Research is responsible for coordinating preparation of the U.S. Government response, and through this notice is seeking the views of experts and interested groups and individuals to help in the formulation of its response. Comments that are provided will be reviewed, integrated, and used, as appropriate, in the preparation of the official U.S. comments.

In this review process, the emphasis should be on providing detailed recommendations on specific chapters for which the reviewer has established expertise or interest. To be most useful, comments should be specific in suggesting wording changes to the text of a particular chapter and, where appropriate, offer supporting
